

Jawaharlal Nehru Govt. Engineering College, Sundernagar, Distt. Mandi (H.P)

Program	B.Tech.	Branch/Semester	Civil + ECE + CSE / 2nd Sem
Subject Code	CS-111	Subject Title	Computer Programming
Mid Semester Test (MST) No.	2	Coordinator	Ravi, Aditi, Neena
Max. Marks	50	Time Duration	2 hour
Date of MST		Roll Number	

Note: Attempt all questions

Q. No.	Question	COs	Marks
Q1	I. What are different forms of inheritance? II. Give two advantages and disadvantages of inheritance III. Explain function overloading IV. Define abstract class. V. What are four main features of OOP's? VI. Syntax of pure virtual function. VII. Define function template VIII. What is try catch and throw exception handling in C++? IX. Name two header files included in C++ for working with files. X. Different type of polymorphism.	CO4,5,6	10*2=20
Q2	Explain early binding and late binding. WAP to achieve late binding using virtual function	CO4	10
Q3	WAP for implementing the concept of parameterized constructor and default destructor.	CO4	10
Q4	Define friend function. Give its syntax. WAP for implementing the concept of friend function	CO4	10

Course Outcomes (CO), Students will be able to

CO 111.1 C++ Proficiency: Gain a understanding of C++ program structure, various syntax, data types, and core concepts.

CO 111.2 Programming Skills: Develop programming skills in C++, including data types, operators, and control structures & functions.

CO 111.3 Array & structure: Create data structures and access its elements using arrays and structures

CO 111.4 Object-Oriented Programming: Implementing the concept of Objects, Classes and object-oriented principles like encapsulation, inheritance and polymorphism

CO 111.5 File Handling & Templates: File handling for data I/O and understand the role and usage of templates in C++.

CO 111.6 Exception Handling: Defining and handling exceptions and ensuring program robustness.
