

Jawaharlal Nehru Govt. Engineering College, Sundernagar, Distt. Mandi (H.P)
Department of Computer Science & Engineering (AI&ML)

Program	B.Tech CSE	Semester	3rd
Subject Code	CSPC-313	Subject Title	CAO
Mid Semester Test No.	1st	Course Coordinator	Dr. Meenakshi Shruti Pal
Max. Marks	50	Time Duration	2 Hours
Date of MST	03.10.2024 (M)	Roll Number	

Note: Attempt all questions

Q. No.	Question	COs, RBT level	Marks
Q1	a. List various features of RISC and CISC. b. Apply stack operation to evaluate: $5*4+6*2$ c. Mention the types of CPU organization. d. Define micro-operations with example. e. Discuss register transfer language.	CO2, L1 CO1, L3 CO2, L2 CO1, L2 CO1, L2	2x5=10
Q2	Explain different types of addressing mode.	CO2, L2	10
Q3	Compare Programmed I/O and Interrupt-Initiated I/O.	CO2, L4	10
Q4	Discuss instruction codes and types of instructions.	CO1, L2	10
Q5	Explain the DMA with the help of neat and clean diagram.	CO2, L2	10

Course Outcomes (CO)

Students will be able to

1. Demonstrate proficiency in register transfer language and perform operations including bus and memory transfers, as well as logic and shift micro-operations.
2. Assess various CPU architectures, I/O, memory organisation, addressing modes and modes of data transfer
3. Apply computer arithmetic and memory mapping
4. Design and analyze advanced memory systems and parallel processing concepts, including cache memory, virtual memory, and pipelining.

RBT Classification	Lower Order Thinking Levels (LOTS)			Higher Order Thinking Levels (HOTS)		
RBT Level Number	L1	L2	L3	L4	L5	L6
RBT Level Name	Remembering	Understanding	Applying	Analyzing	Evaluating	Create
